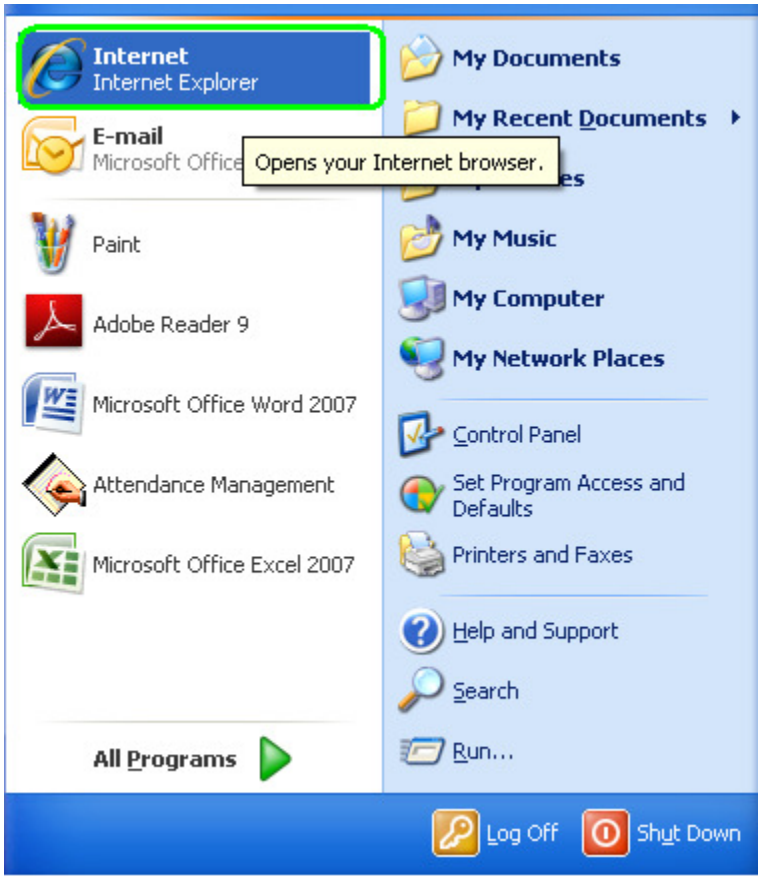
HOW TO SET UP MYQ-SEE DDNS FOR Q-See DVR SYSTEMS

MODEL NUMBERS:

QSD2316L, QSTD2408, QSTD2416, QSDT8DP

Prior to setting up DDNS for your DVR, your DVR must be set up for remote viewing.

STEP 1: Go to your desktop computer and go to Internet Explorer.



STEP 2: Go to http://www.myq-see.com/.

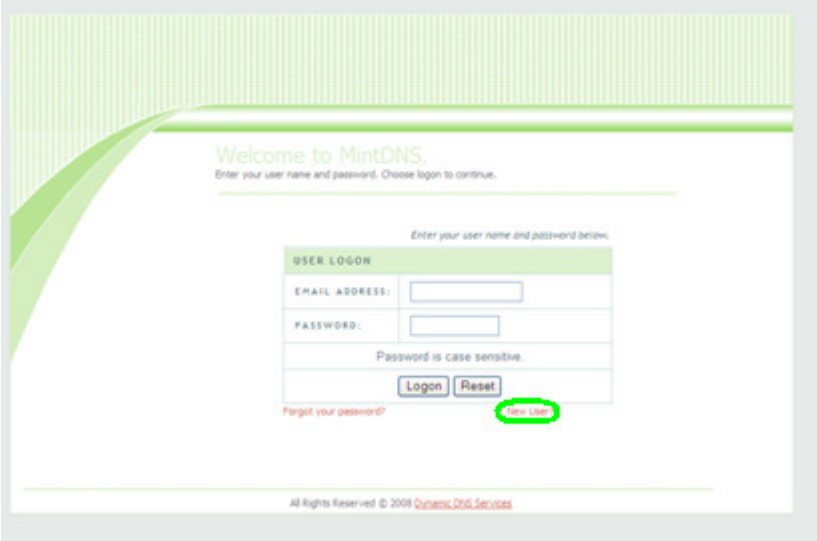
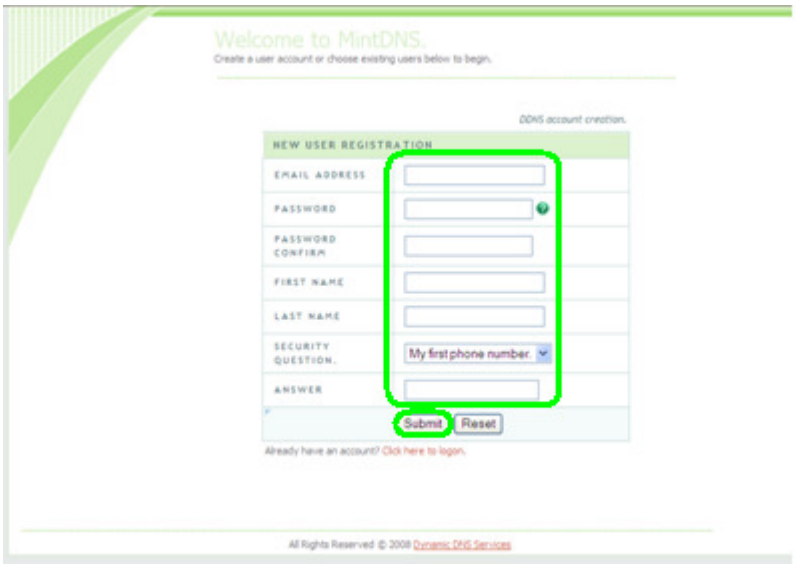
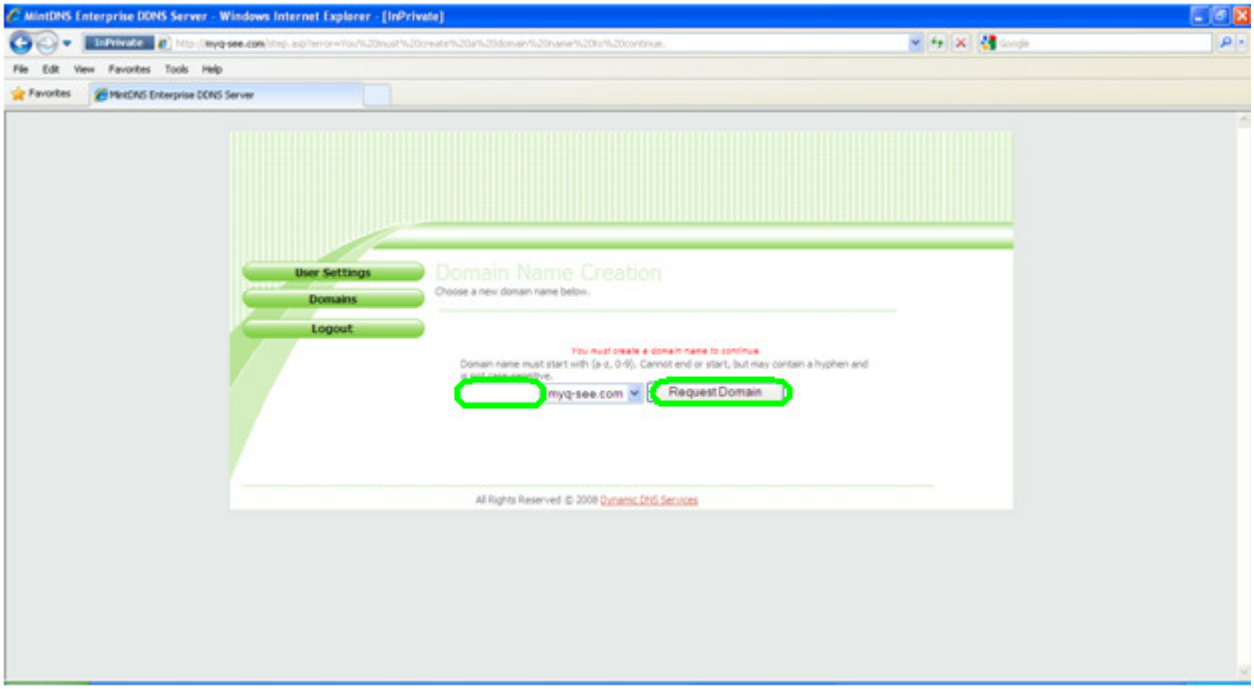
STEP 3: Click on "New User?".



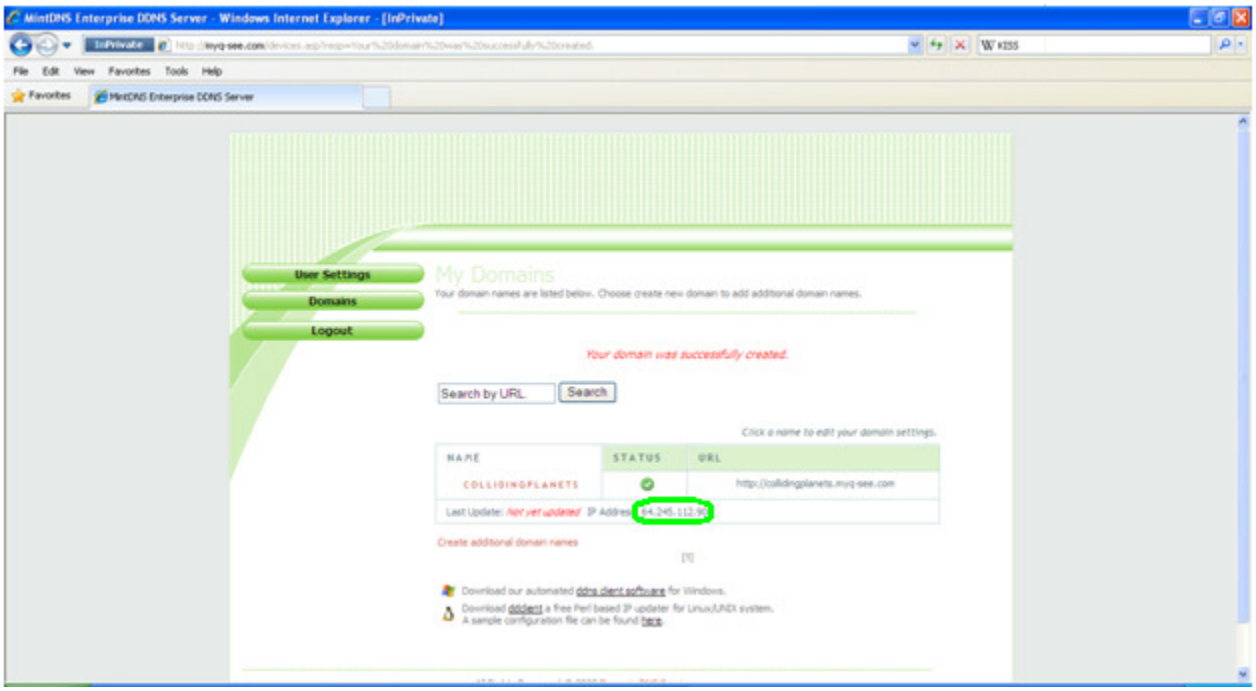
STEP 4: Enter in the required information into their respective fields and then click “Submit”.



STEP 5: Enter a domain name in the required field and then click “Request Domain”.



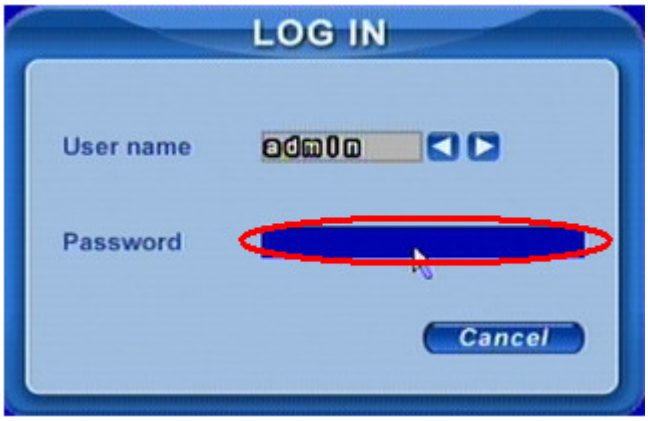
STEP 6: Your domain name has been set up; write down your IP address.



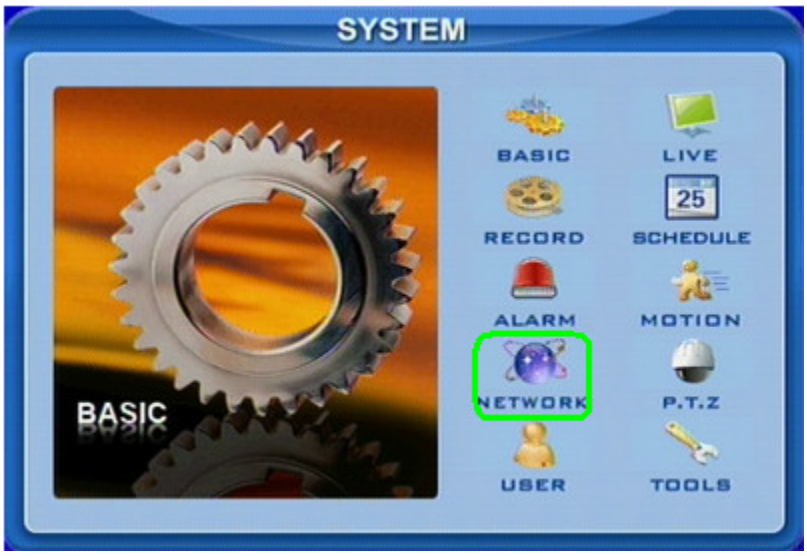
STEP 7: On the channel display, right click and a small control bar will appear at the bottom of the screen. Move the cursor to the “Menu” button and click it.

STEP 8: Move the cursor to the "System" button and click it.

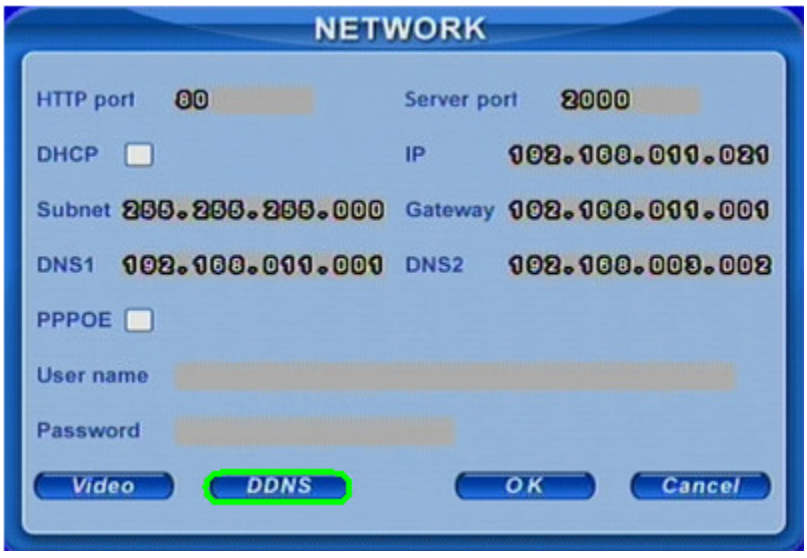
STEP 9: Enter Login information to access the System menu. Default User name is "admin" and default Password is "123456" (this can be punched in on the front panel of the DVR using the digital buttons and direction keys).



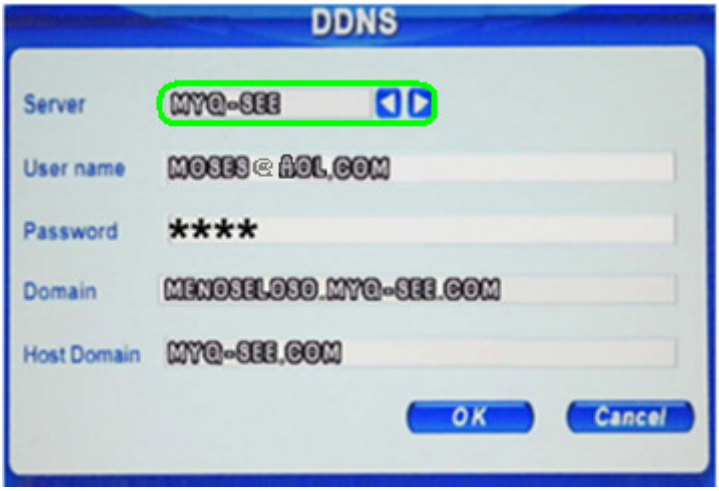
STEP 10: Move the cursor to “Network” and click.



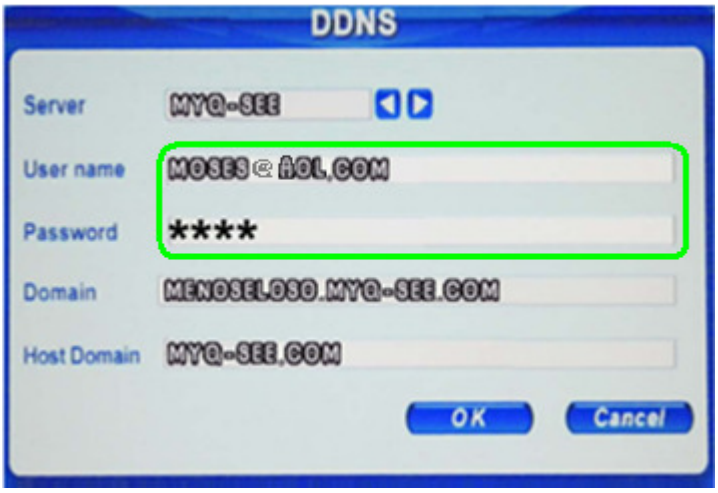
STEP 11: Move the cursor to “DDNS” and click.



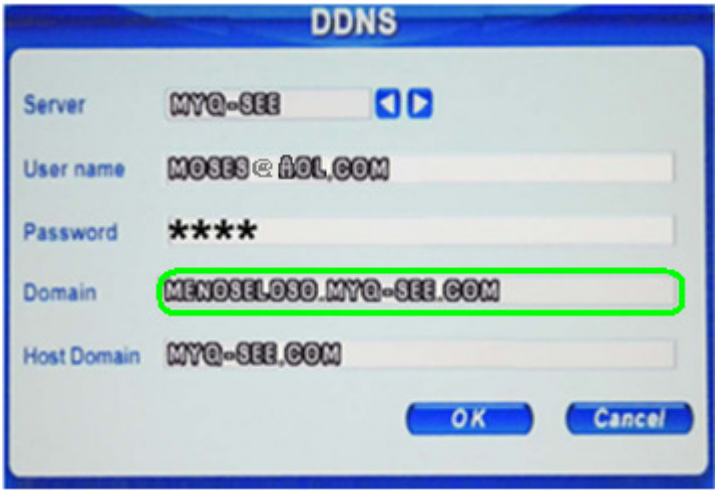
STEP 12: Set the server to “MYQ-SEE”.



STEP 13: Input the user name and password you associated with your MyQ-See domain name.

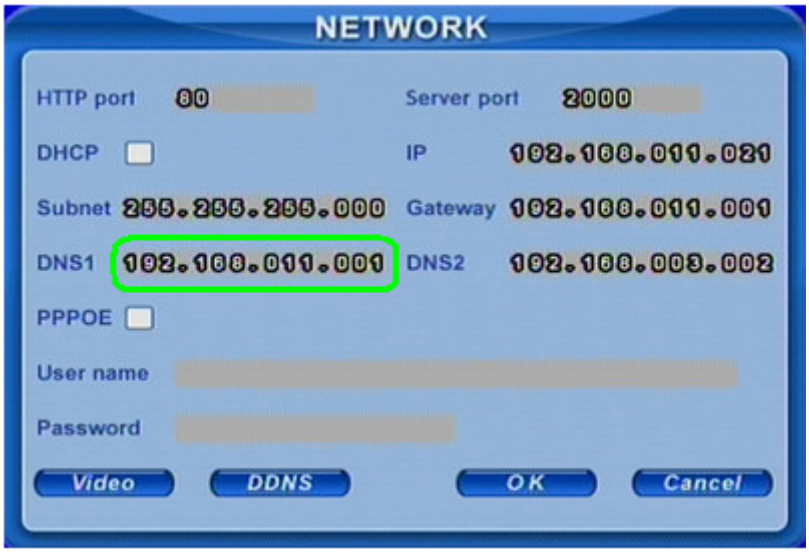


STEP 14: Enter the domain name you created.

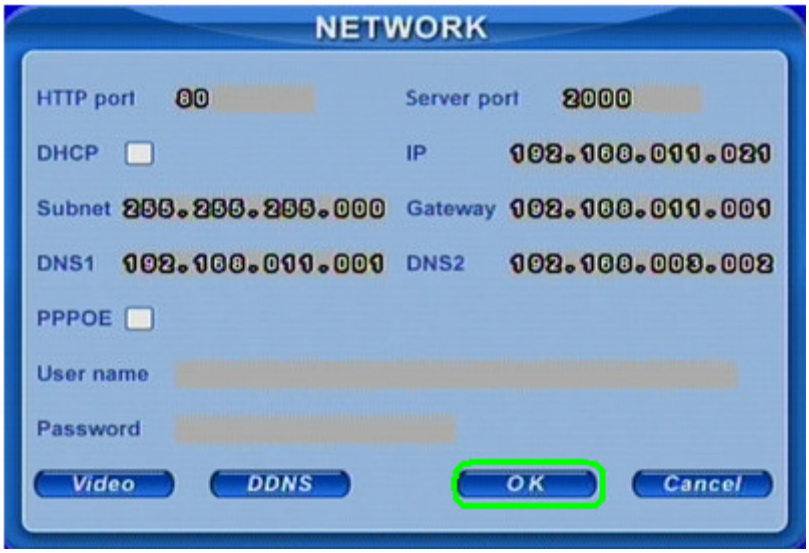


STEP 15: Move the cursor to "OK" and click.

STEP 16: Enter in the DNS (you can find this on your router under Primary Domain Name Server/DNS on the status tab).

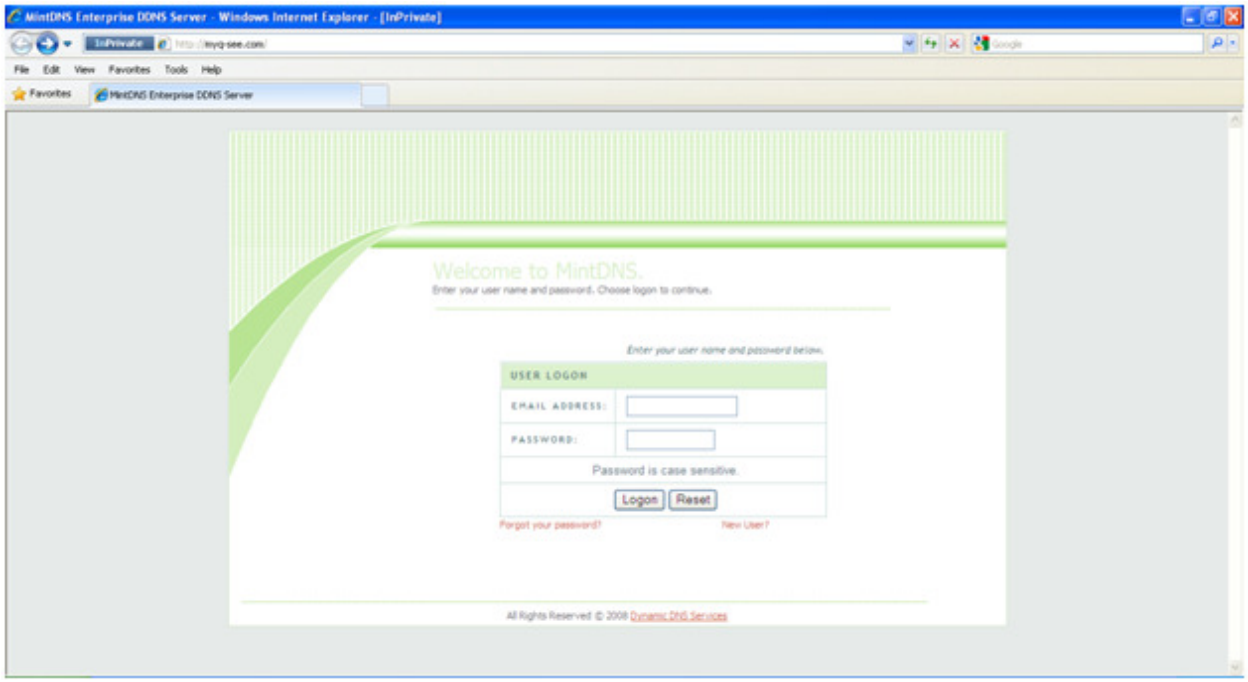


STEP 17: Move the cursor to "OK" and click.

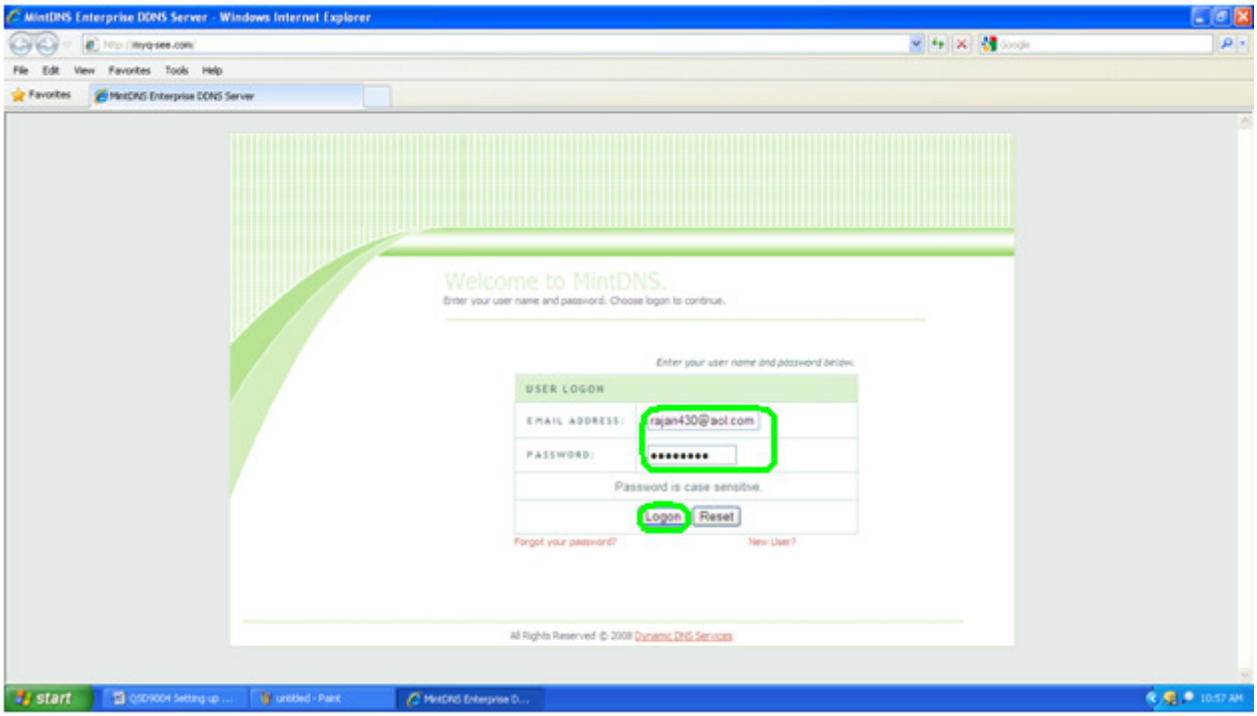


STEP 18: Go to your desktop computer and go to Internet Explorer.

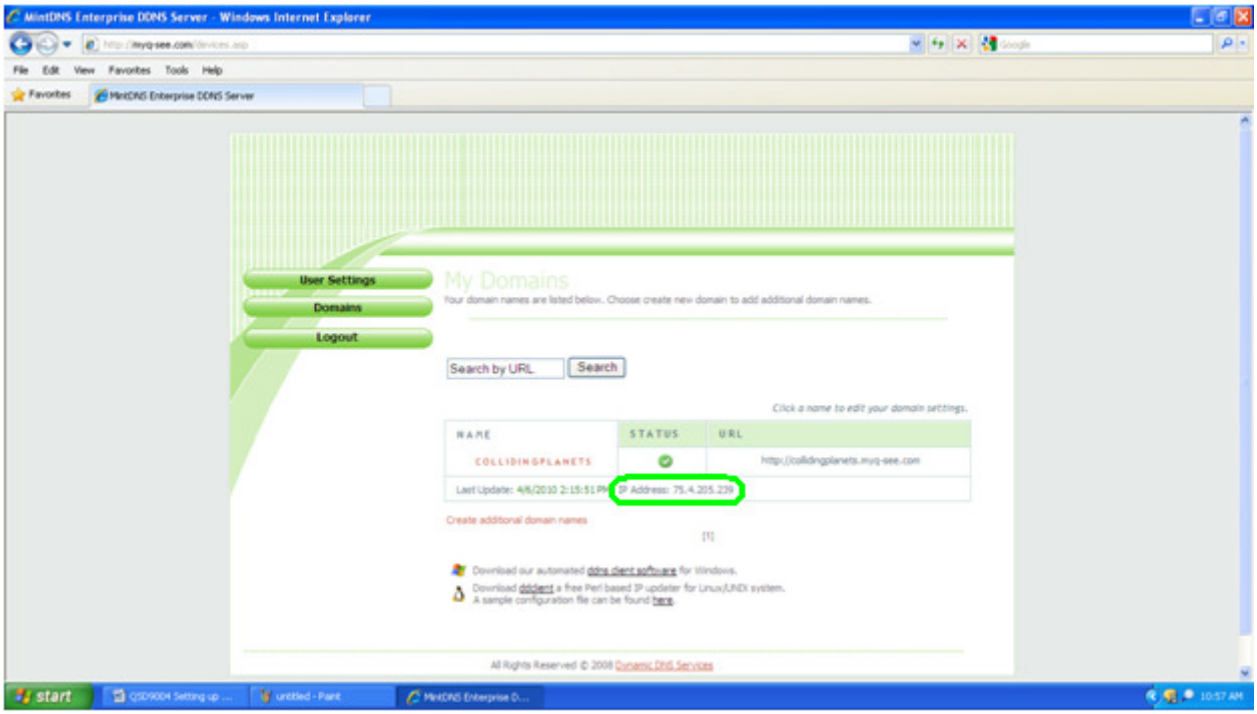
STEP 19: Go to http://myq-see.com/ .



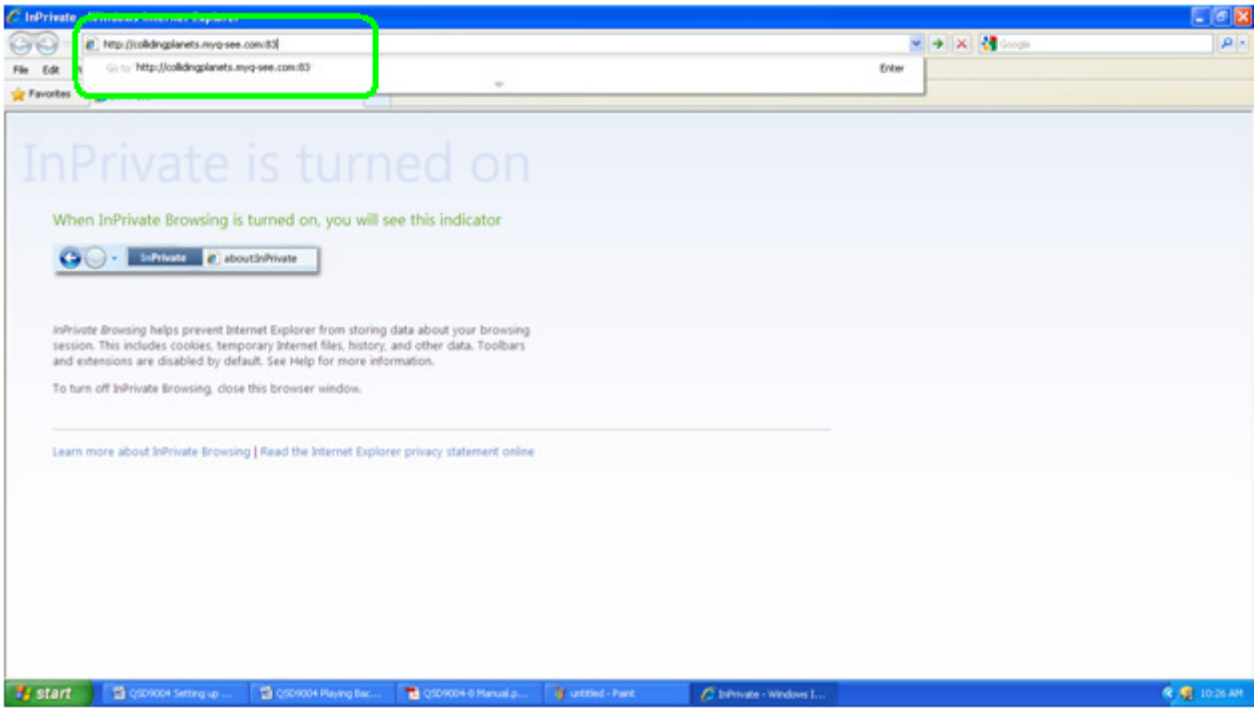
STEP 20: Enter the login information that is associated with your domain name that you created.



STEP 21: Check the IP address to see if it has updated to match the external IP address of your router that you forwarded your ports to.



STEP 22: On the address bar, enter in the domain name you created followed by the port that you forwarded (for example: http://example.myq-see.com:83).



InPrivate is turned on
When InPrivate Browsing is turned on, you will see this indicator
InPrivate Browsing helps prevent Internet Explorer from storing data about your browsing session. This includes cookies, temporary Internet files, history, and other data. Toolbars and extensions are disabled by default. See Help for more information.
To turn off InPrivate Browsing, close this browser window.
